

Set - A

Paper Code : 11037

University Examination – January 2025

MBBS 3rd Professional Part I

Community Medicine

First Paper

TIME: Three hours

Maximum marks: 100

Note:

- (i) Attempt all questions.
- (ii) For MCQ's separate answer sheet is provided which will be taken back after 20 minutes of the start.
- (iii) Write theories answers in separate answer books for Section A and Section B.

MCQ's

(20×1=20 Marks)

Choose one correct answer.

- 1. Human development index include all except:
(A) Mean year of schooling ~~(B) Life expectancy at age 1~~
~~(C) Real GDP per capita~~ (D) Adult Literacy rate X
- 2. Long term fluctuation is seen in:
(A) Cyclic trends (B) Epidemics
~~(C) Secular trends~~ ~~(D) Seasonal trends~~ X
- 3. Prevalence is a:
(A) Rate ~~(B) Ratio~~
~~(C) Proportion~~ (D) Mean X
- 4. Recall bias is most commonly with which study design?
~~(A) Case control study~~
(B) Cohort study
~~(C) Randomized control trial~~
(D) Cross sectional study
- 5. Randomized control trial randomization is an attempt to eliminate:
~~(A) Selection bias~~ (B) Outcome bias
(C) Uncontrolled trials (D) Natural experiments (D)

PTO

6. Positive predicted value does not depend upon
(A) Sensitivity (B) Specificity
(C) Prevalence of disease (D) Incidence of disease
7. Storage temperature of vaccine is:
(A) -4°C to 0°C (B) 0°C to 4°C
(C) $+2^{\circ}\text{C}$ to $+8^{\circ}\text{C}$ (D) $+4^{\circ}\text{C}$ to 12°C
8. True about secondary booster response is comparison to that of primary response are all except:
(A) Shorter latent period
(B) Antibody is maximum
(C) Antibody response maintained at higher level for longer period of time
(D) Production of antibody more slow
9. Standard deviation is a measure of
(A) Dispersion from the mean (B) Chance
(C) Central tendency (D) None
10. In a left skewed curve, true statement is:
(A) Mean = Median (B) Mean < Mode
(C) Mean > Mode (D) Mean = Mode
11. Age pyramid of India is
(A) Broad at base and narrow at apex
(B) Broad from base to apex
(C) Broad at apex and narrow at base
(D) All of the above
12. Pearl index is expressed:
(A) Per 50-woman years (B) Per 10-woman years
(C) Per 1000-woman years (D) Per 100-woman years
13. All are "Water-Washed Diseases" except:
(A) Trachoma (B) Scabies
(C) Typhoid (D) Conjunctivitis
14. The best parameter to measure air pollution is:
(A) SO_2 (B) CO_2
(C) CO (D) N_2O
15. Exposure to noise above cause permanent loss of hearing:
(A) 85 dB (B) 90 dB
(C) 100 dB (D) 160 dB

16. Case control study is used for study of:
(A) Common diseases (B) Rare diseases
(C) Uncommon diseases (D) Unknown diseases
17. Maternal Mortality Ratio is calculated by:
(A) Maternal deaths/live birth
(B) Maternal deaths/1000 live births
(C) Maternal deaths/100000 population
(D) Maternal deaths/100000 live births
18. Which of the following advice should be given for an infant suffering from mild diarrhea?
(A) Continue breast feeding
(B) Antibiotics
(C) Stop all breast feed and start ORS
(D) Intravenous fluid administration
19. Hemophilia is a genetic disorder of coagulation seen only in males. It is transmitted as:
(A) X-linked dominant (B) Y-linked dominant
(C) X-linked recessive (D) Autosomal recessive
20. All of the following disorders are Autosomal dominant except:
(A) Neurofibromatosis (B) Retinoblastoma
(C) Marfan's syndrome (D) Ataxia telangiectasia

Probb 2021 Batch Paper I

Section A

(40 Marks)

Q.1. Describe following steps in case control study design: (4+3+3=10 Marks)

- (a) Selection of cases and controls
(b) Matching
(c) Analysis and interpretation

Q.2. Write short answers:

(6 Marks Each)

- (a) Describe short note on disability limitation.
(b) Describe common, minor vaccine reactions.
(c) Describe relative risk and attributable risk.
(d) Write short note on sampling methods.
(e) Describe in brief isolation and quarantine.

→ Tertiary Prevention
Concept of Herd Immunity

PTO

Section B

(40 Marks)

Q.1. Describe various types of hormonal contraceptives and their mechanism of action. Discuss side effects and contraindications of their use.

(4+3+3=10 Marks)

Q.2. Write short answers:

(6 Marks Each)

(a) Describe risk approach to identify high risk pregnancy.

(b) Discuss various social security services available for geriatric population.

(c) Explain different types of genetic counseling.

(d) Describe anti-larval measures of mosquito control.

(e) Discuss physician's role and responsibility to society and the community that she/he serves.

Set - B
Paper Code : 11038

University Examination – January 2025

MBBS 3rd Professional Part I

Community Medicine

Second Paper

TIME: Three hours

Maximum marks: 100

Note:

- (i) Attempt all questions.
- (ii) For MCQ's separate answer sheet is provided which will be taken back after 20 minutes of the start.
- (iii) Write theories answers in separate answer books for Section A and Section B.

MCQ's

(20×1=20 Marks)

Choose one correct answer.

1. Mode of transmission of Influenza does not include
(A) Droplet infection (B) Droplet nuclei
(C) Fomites ~~(D) Sexual transmission~~
2. In which year, the World Health Organization (WHO) was founded?
(A) 1989 (B) 1967
~~(C) 1948~~ (D) 1956
3. With which organization, World Health Organization has partnered with to provide covid-19 information to the world's most vulnerable people?
(A) Google ~~(B) Facebook~~
(C) Microsoft (D) Apple
4. Which method is a useful educational method for school children?
(A) Demonstration ~~(B) Role play~~
(C) Simulation exercise (D) Group discussion
5. For effective group discussion, the group should consist of:
~~(A) 4-5~~ (B) 6-12
(C) 30-50 (D) 60-75
6. Which of the following is a barrier to communication?
(A) Illiteracy ~~(B) Attitude~~
(C) Level of intelligence (D) All of above

PTO

7. In which year, the Government of India launched the Reproductive and Child Health (RCH) Programme?
(A) 1994 (B) 1995
(C) 1996 (D) 1993
8. Which of the following is the primary component of Janani Shishu Suraksha Karyakram?
(A) Early Registration (B) Institutional Birth
(C) Post Delivery Care (D) All the Above
9. Which of the following is not a goal of National Rural Health Mission (NRHM)?
(A) Reduction in Infant Mortality Rate (IMR) and Maternal Mortality Ratio (MMR) \
(B) Universal access to public health services
(C) Prevention and control of communicable and non-communicable diseases
(D) Employment guarantee
10. Which is not a part of the goals of National Population Policy 2000?
(A) Improve education level
(B) Improve age of marriage
(C) Address unmet needs of family planning methods
(D) Improve the economic status
11. PEM occurs particularly in.....
(A) Weaning
(B) Children in first year of life
(C) Children in second year of life
(D) All of them
12. Body building food is also known as....
(A) Catabolic food (B) Anabolic food
(C) Metabolic food (D) All of them
13. Adult protein requirements according to ICMR is...
(A) 1 gm of protein per kg of body weight
(B) 2 gm of protein per kg of body weight
(C) 0.83 gm of protein per kg of body weight
(D) 10 gm of protein per kg of body weight
14. Which of the following diseases is an example of non-communicable diseases?
(A) Cancer (B) Diabetes
(C) Hypertension (D) All of the above

15. Goitre and the enlarged thyroid gland are mainly diagnosed in patients with deficiencies of which of the following minerals?
(A) Iron ~~(B) Iodine~~
(C) Calcium (D) Phosphorus
16. Which of the following diseases is caused by protein deficiency?
(A) Anaemia ~~(B) Kwashiorkor~~
(C) Hypothyroidism (D) All of the above
17. Lathyrism is caused by
(A) Argemone seeds ~~(B) Kesari dal~~
(C) Aflatoxin (D) Heavy metals
18. Obesity and overweight increases risk of
(A) Communicable diseases
(B) AIDS
~~(C) Non-communicable diseases~~
(D) All of these
19. Heat cramps are due to deficiency of
~~(A) K MnO₄~~ (B) Iron
(C) Ca, P ~~(D) NaCl~~
20. Which of following is not sexually transmitted disease?
(A) AIDS (B) Syphilis
~~(C) Chicken Pox~~ (D) Gonorrhoea

2021 Paper 2 probb

Section A

(40 Marks)

Q.1. Define food adulteration. Enumerate the food adulterants. Describe the Prevention of Food Adulteration. (2+2+6=10 Marks)

Q.2. Write short answers: (6 Marks Each)

- (a) GOBI-FFF ^{Education}
(b) Communication process ^{Family & society}
(c) SBCC — Behavioural change & communication
(d) Steps of investigation of epidemic of a diarrhoeal disease
(e) Dietary survey

PTO

Section B

(40 Marks)

Q.1. Explain the Joint National Committee (JNC-8) Guidelines of Hypertension. Classify the risk factors of hypertension. Describe the prevention and control measures of Hypertension. (3+3+4=10 Marks)

Q.2. Write short answers: (6 Marks Each)

- (a) Indian Public Health Standards for Primary Health Centre
- (b) Pneumoconiosis
- (c) Integrated Management of Neonatal and Childhood Illness (IMNCI)
- (d) Planning cycle
- (e) (Read scenario and answer the related questions)

During the year 2020 there was a case with fever and cough and dyspnea in the ward no. – 10 and it was reported by health staff that he came from South Africa.

- (i) How you will investigate the case?
- (ii) How will you manage the case?
- (iii) What steps you will take to stop the transmission of the disease?

(2+2+2=6 Marks)

Rohilkhand Medical College & Hospital
MBBS (Batch 2021)
Send-up Exam (Dec, 2024)
Community Medicine
Paper - 1

Total Time:- 2 hours and 40 minutes

Maximum Marks:- 80

Parts of a question must be attempted in sequence. Draw well labeled diagrams wherever necessary.

MCQs (separate sheet will be provided)

[01x20=20]

Section A (40 Marks)

Structured Long Question: (3+3+4=10 Marks)

Case Scenario: A village reports frequent outbreaks of measles among children under five years. Upon investigation, it is found that less than 50% of the children are vaccinated.

1. Identify the key public health issues in this scenario.
2. Discuss the role of herd immunity and the importance of routine immunization.
3. Suggest a plan to improve immunization coverage, including strategies for community Mobilization.

Short Answer Questions (5 x 6=30 marks)

1. A population shows a high prevalence of diabetes despite increased health awareness, discuss the gaps in implementing primary prevention strategies
2. A health center plans to start a screening program for cervical cancer, identify the factors that should be considered to ensure its effectiveness in the target population
3. During a foodborne illness outbreak, cases are clustered around a specific event, what are the epidemiological methods to confirm the source.
4. In evaluating the impact of a new vaccination program, mention the strategies that could be used to monitor its effectiveness.
5. How shall you break the news of death of a young boy in an accident to his parents?

Section B (40 Marks)

Structured Long Question: (2+2+2+2+2=10 Marks)

Case Scenario: A 24-year-old pregnant woman in her second trimester visits the primary health center for the first time. She has not received any antenatal care so far. On examination, it is noted that she is underweight, anemic, and has not been vaccinated with tetanus toxoid. She is unaware of the benefits of antenatal care, institutional delivery, and postnatal care.

1. Identify and explain the key obstetric issues highlighted in the case.
2. Discuss the essential components of antenatal care that should be provided to this woman, including screening, counseling, and interventions.
3. Explain the importance of nutritional supplementation (iron, folic acid) and vaccination (tetanus toxoid) during pregnancy.
4. Propose a plan to promote awareness about the benefits of antenatal care and institutional delivery in the community.

5. Describe how preventive obstetric care can reduce maternal and neonatal morbidity and mortality.

Short Answer Questions (5 x 6=30 marks)

1. A school reports high dropout rates due to malnutrition-related illnesses, how would you use existing programs like the mid-day meal scheme to address this issue?
2. Explain the importance of the Crude Birth Rate (CBR) and Total Fertility Rate (TFR) in demographic studies.
3. In a rural community, the majority of patients with depression do not seek treatment, how would you design a program to improve access and reduce stigma in such a setting?

4. What are the barriers to the adoption of family planning methods in rural India, and how can they be addressed?

5. A city facing increased air pollution sees a rise in respiratory diseases, how would you address this issue using community and policy-level interventions?

Rohilkhand Medical College & Hospital
MBBS (Batch 2021)
Send-up Exam (Dec, 2024)
Community Medicine
Paper - 2

Total Time:- 2 hours and 40 minutes

Maximum Marks:- 80

Parts of a question must be attempted in sequence. Draw well labeled diagrams wherever necessary.

MCQs (separate sheet will be provided)

[01x20=20]

Structured Long Question: (4+2+4=10 Marks)

A 2-year-old female child presents with a history of fever, oedema, and depigmentation of skin and hair and comes to a regional Child Care Centre. There is history of not gaining weight since 3 months. On examination, the child weighs 8 kgs and has enlarged liver. *Unit - 11, Pg - 20, 21*

1. What could be the probable diagnosis in the above condition and explain in detail the preventive measures. *Pg 20, 21*
2. List the various nutritional problems in Public Health. *Pg 33, 34*
3. Explain the impact of nutritional deficiencies on the growth and development of children and the role of public health policies in addressing them. *Pg - 33, 34, 35, 36*

Short Answer Questions (5x6=30 marks)

1. Despite widespread implementation of the National Tuberculosis Elimination Program (NTEP), certain districts report poor treatment outcomes, what could be the reasons and how can they be addressed? *Resp infection 5.1*
2. Design and implement a community-based program to address depression and anxiety among adolescents? *Pg*
3. How would you develop a culturally tailored health education initiative to encourage exclusive breastfeeding in a community with limited knowledge and understanding? *Unit 10 Pg - 6*
4. Explain the significance of collaboration between WHO and national health agencies in managing pandemics. *Unit 23 page - 4*
5. A rural health worker reports that children under five are most affected by malaria in her village. What targeted interventions would you suggest to reduce malaria morbidity and mortality in this age group?

*↳ 5.3 Anthropoed Borne Infection
Chapter - 2 malaria*

Section B (40 Marks)

Structured Long Question: (3+3+4=10 Marks)

A 45-year-old man visits a primary health center with complaints of hypertension and obesity. He has a sedentary lifestyle and consumes fast food regularly.

1. What are the risk factors for NCDs highlighted in this scenario?
2. Discuss the role of lifestyle modification in the prevention and control of NCDs.
3. Propose a community-based intervention program to address NCDs in this population.

Short Answer Questions (5x6=30 marks)

1. A hospital has recurring incidents of improper biomedical waste disposal, how would you ensure compliance with waste management protocols? Unit 14, Pg 2, 3
2. A rural health program faces resistance from the local population, what strategies can be used to increase community participation and trust?
3. Workers in a factory complain of respiratory symptoms due to poor ventilation, how would you address occupational health hazards in such a workplace? Unit 16 Pg 14
4. Following a cyclone, cases of diarrhea and malnutrition surge in relief camps, how would you design an emergency response to mitigate these health impacts?
5. After a medication error occurs, a patient experiences minor side effects. How would you handle this situation ethically and professionally with the patient and their family?

Set - A
Paper Code : 11037
University Examination – January 2023
MBBS 3rd Professional Part I
Community Medicine
First Paper

TIME: Three hours

Maximum marks: 100

Note:

- (i) Attempt all questions.
- (ii) For MCQ's separate answer sheet is provided which will be taken back after 20 minutes of the start.
- (iii) Write theories answers in separate answer books for Section A and Section B.

MCQ's

(20×1=20 Marks)

Choose one correct answer.

1. Natural history of a disease is defined as the course that disease will take when:
(A) It has not been affected by any treatment or any other intervention
(B) All proper steps for diagnosis and treatment have been undertaken
(C) Only the patients seen at outpatient department have been followed up till recovery or death
(D) All of the above •
2. Age is:
(A) Interval scale • (B) Ordinal scale
(C) Ratio Scale (D) Nominal scale
3. Rapid detection of dengue infection within 3 days of onset of fever is based on detection of which antibody?
(A) IgG (B) IgM •
(C) IgA (D) IgE
4. Which antibody helps in community control of poliomyelitis following administration of OPV?
(A) IgA (B) IgG •
(C) IgM (D) IgE

PTO

5. Which of the following socio-demographic indicator is most commonly used in national health planning?
 - (A) Crude Death rate
 - (B) General fertility rate
 - (C) Net reproduction rate
 - (D) Total fertility rate
6. For a screening programme to be effective, the "lead time" should be:
 - (A) Large
 - (B) Small
 - (C) Very small
 - (D) Lead time has no effect on the effectiveness of a screening programme
7. Variations in the blood pressure values due to diurnal variations are due to:
 - (A) Intraobserver variations
 - (B) Interobserver variations
 - (C) Biological variations
 - (D) Instrument variations
8. All of the following are included in demographic process except:
 - (A) Mortality
 - (B) Morbidity
 - (C) Marriage
 - (D) Fertility
9. Fecundity of a woman denotes:
 - (A) Actual bearing of children
 - (B) Fertility pattern of a woman
 - (C) Child bearing capacity of a woman
 - (D) Age of marriage of a woman
10. What is the most common side effect of IUD insertion?
 - (A) Pain
 - (B) Bleeding
 - (C) Infection
 - (D) Ectopic pregnancy
11. Normal weight gain during the entire pregnancy is expected to be (in Kg):
 - (A) 5-7
 - (B) 7-9
 - (C) 10-12
 - (D) 12-14
12. All of the following colour codes are present in IMNCI except:
 - (A) Red
 - (B) Blue
 - (C) Yellow
 - (D) Green

13. In newborn babies, hypothermia is defined as temperature less than:
(A) 35°C (B) 36°C
(C) 37°C (D) 38°C
14. While locating a well, it should be at least how many feet away from a source of pollution (such as a latrine)?
(A) 15 (B) 25
(C) 50 (D) 100
15. Which of the following arthropods is involved in biological transmission of human diseases?
(A) Mosquito (B) Bedbug
(C) Housefly (D) Cockroach
16. Scrub typhus is transmitted by the vector:
(A) Xenospylla sp (B) Pediculus humanus
(C) Hard tick (D) Trombiculid mite
17. Bangalore method is a type of:
(A) Landfilling (B) Vermicomposting
(C) Composting (D) Dumping
18. The Biomedical waste management rules were first promulgated in our country in:
(A) 1998 (B) 2010
(C) 2016 (D) 2018
19. Normal genes can be converted into abnormal ones by means of:
(A) Mutation (B) Penetrance
(C) Dominance (D) Polygenes
20. Rhesus positive means possession of which one of the following antigens:
(A) C (B) D
(C) E (D) All of the above

Proft

2020 Batch Paper I

Section A

January.

(40 Marks)

Q.1. Define Epidemiology and list various epidemiological study designs. What are cohort studies? Briefly discuss the steps in a case control study.
(3+3+4=10 Marks)

PTO

Q.2. Write short notes on:

(6 Marks Each)

- (a) Normal Distribution Curve
- (b) Principles of Primary Health Care
- (c) Open Vial Policy in Immunization
- (d) Vitamin A supplementation is necessary after measles infection – Gives reasons.
- (e) Compare a screening test with a diagnostic test.

Section B

(40 Marks)

Q.1. Define Infant Mortality Rate: What are the factors affecting IMR in India? Discuss the preventive measures to reduce the infant mortality.

(3+3+4=10 Marks)

Q.2. Write short notes on:

(6 Marks Each)

- (a) Integrated Vector Control
- (b) Sanitation Barrier
- (c) Water Borne and Water related diseases
- (d) Risk Approach in MCH
- (e) Role and responsibility of doctor to society and the community that she/he serves

Send Up Examination, Batch 2020, November 2023
Community Medicine Paper I
Rohilkhand Medical College & Hospital, Bareilly

Time: 3 hours.

Marks: 80+20=100

Note: Attempt all question in the given sequence. Draw appropriate diagrams and explain with examples wherever necessary

Section A (Marks: 40)

Q1. Structured Long Essay Questions/Problem based questions/ Modified Essay Questions

You are working as scientist B in an institute and you are planning research to conduct in the catchment areas of your institute.

Answer the following question in context with above scenario (2+4+6 = 10 Marks)

- a. Define epidemiology
- b. Enlist the type of epidemiological studies.
- c. Explain briefly the merits and demerits of case control and cohort study design.

Q2. Short Essay Questions (SEQs) (6 marks each=30Marks)

- a. Describe the uses of screening
- b. Draw the diagrams of 3 types of graphs frequently used in data presentation
- c. Explain the natural history of diseases
- d. Differentiate between active and passive immunization using examples of immunization against tetanus and rabies
- e. Discuss the steps of investigation of an epidemic

Section B (Marks: 40)

Q1. Structured Long Essay Questions/Problem based questions/ Modified Essay Questions

An epidemic of diarrhoea of unknown aetiology has occurred in the nearby locality, suspects say they have common source of water supply from nearby river. How will you carry out surveillance of this water supply on following parameters

Answer the following question in context with above scenario (Marks 2+2+6=10)

- a. Describe steps of sample collection of water
- b. Discuss the methods of transportation of water sample
- c. Explain the surveillance of drinking water

Q2. Short Essay Questions (SEQs) (6 marks each=30Marks)

- a. Discuss the newer techniques in health based on genetic engineering
- b. Explain the principles and uses of essential medicine under NHM
- c. Describe the third generation IUDs
- d. Explain the IMNCI role in preventing Diarrhoeal diseases
- e. Enumerate the indicators of fertility and describe any one

Remedial Examination
Batch 2020, September, 2023

Community Medicine

Rohilkhand Medical College and Hospital, Bareilly

Max. Marks: 40

Time 1 hour 50 Minutes

Note :

- Attempt all questions
- Write theories answers in separate answer book

Long answer question

Q1. Read the following case scenario and answer the questions (Marks 10)

A study from BIU examined whether the risk of Hepatitis C (Hep C) was related to whether people had tattoos. A sample of 600 individuals was randomly selected from the student population. In this sample 113 had a tattoo. For individuals with a tattoo, 22 were found to have Hepatitis C and for individuals without a tattoo, 25 were found to have Hepatitis C. Researchers want to know if there is evidence from this study of an increased prevalence of Hep C for individuals with a tattoo amongst the population from which they were sampled.

- What study design is being used in this example? [1 mark]
- Explain the detail steps of above study design? [2 marks]
- Give formal statements of the Null and Alternative hypotheses. [2 marks]
- Interpret the data in details? [3 marks]
- Classify the various types of study designs? [2 marks]

Q2. Short Answer Questions (6 Marks x 5=30 Marks)

- Explain the importance human wellbeing indexes.
- Explain the criteria for evaluation of screening tests
- Enumerate vaccines and describe schedule, dose, site and modes of vaccination in the National Immunization Schedule
- Draw the labelled diagram of normal distribution curve. Write its characteristics.
- Classify the interventional studies. Write steps to conduct any one type of interventional study.

$$\begin{array}{r} 1.8 \\ 2200 \\ \hline 113 \end{array}$$

$$\begin{array}{r} 12 \\ 113 \\ \hline 19 \\ 1017 \\ \hline 113 \\ \hline 2147 \end{array}$$

$$\begin{array}{r} 487 \\ 487 \\ \hline 974 \\ 2435 \end{array}$$
$$\begin{array}{r} 2500 \\ 487 \\ \hline 501 \end{array}$$
$$\begin{array}{r} 113 \\ 22 \\ \hline 226 \end{array}$$

$$19.1$$

$$\begin{array}{r} 12 \\ 113 \\ \hline 18 \\ 1904 \\ \hline 113 \\ \hline 2034 \end{array}$$

Remedial Examination - 2
Batch 2020, September, 2023
Community Medicine
Rohilkhand Medical College and Hospital, Bareilly

Max. Marks: 40

Time: 1 hour 50 Minutes

Note:

- Attempt all questions
- Write theories answers in separate answer book

Q1. Long answer question

Read the following case scenario and answer the questions (Marks 10)

Seeta Devi age 35 years delivered a baby of birth weight 2.1kg in RMCH. Mode of delivery was full term normal vaginal delivery. Baby cried immediately after birth, was pink in colour and active at birth.

Answer the following questions

- a. What is the classification of neonates as per birth weight? Also tell in which category the above child lies? (2 marks)
- b. Enumerate causes of Low birth weight in India. (2 marks)
- c. Explain the method for home-based care for low-birth-weight children. (3 marks)
- d. What counselling regarding feeding of child should be given to the mother? (3 marks)

Q2. Short Answer Questions (6 Marks x 5=30 Marks)

- a. Define Natural contraception, their mechanism, methods used for natural contraception, merits & demerits of each method.
- b. Enumerate indicators for air pollution level. Enumerate causes of air pollution. Discuss measures for control & prevention of air pollution.
- c. Enumerate fertility related indicators. Explain TFR & NRR. What target was set to achieve for these indicators for population stabilisation?
- d. Enumerate types of mosquito & major vector borne diseases caused by them in India. Explain integrated vector management to prevent & control Vector borne Diseases in India.
- e. Describe role of essential medicine in primary health care. Enumerate programs & steps taken by the Indian Government for providing affordable medicine for all.

**MBBS 3rd Professional (Part -I)
Semester Examination 2022
Batch 2019, December 2022
Community Medicine
Paper 1**

Time: 3 hours

Note:

Maximum Marks: 100

- (i) Attempt all questions
- (ii) For MCQs separate answer sheet is provided which will be taken back after 20 minutes of the start
- (iii) Write theories answers in separate answer books for section A and section B
MCQs (20 Questions) of 1 Mark each (1x20=20 Marks)

Section - A (40 Marks)

Q1. A medical officer recently recruited in a primary health centre (PHC), Under catered area of the PHC there is a village with a population of 2200 and in this village there is an outbreak of a disease due to which 352 cases developed loose watery stool, increased thirst and vomiting. (2+5+3= 10 Marks)

- a) What is this condition called?
- b) How the medical officer will investigate this outbreak, describe the steps.
- c) What will be the recommendations made by the medical officer to the stakeholder at various levels to prevent the recurrence of this types of outbreaks in future?

Q. 2. Short Answer Questions (SAQs) (6 Marks each=30Marks)

- a) Determinants of Health
- b) Randomized Controlled Trials
- c) Herd Immunity
- d) Chi-Square Test
- e) Uses of Screening

Section - B (40 marks)

Q.1. An educational institute is situated in a geographical area which has annual parasite index <1. District Malaria Office of the area conducted a survey and found the index density of mosquitoes to be 5.5 in the affected areas against the permissible limit of 2. (2+4+2+2= 10 Marks)

- a) Explain the relevance of two indices mentioned in the above scenario
- b) Describe the integrated approach of mosquito control
